

Lactated Ringer's Injection Recall Alert

Date of Notice: 05/08/2020

Brief Description of Recall

On May 8, 2020, ICU Medical, Inc. is voluntarily recalling one lot of lactated ringer's injection due to the presence of particulate matter identified as iron oxide.

Administration of a drug product that contains metal particulate matter could result in adverse events ranging from inflammation at the site of injection to more serious events that could include the formation of a blood clot obstructing the flow of blood which could lead to end-organ damage or death.

Affected Products

Drug Name & Strength	NDC	Lot	Expiration Date
Lactated Ringer's Injection, USP	0409-7953-09	07-514-FW	07/01/2021
