**National Commercial Drug Formulary**

JULY 2024

## INTRODUCTION

A drug formulary is a list of prescription drugs, both generic and brand name, used by doctors and other health care providers to identify and prescribe drugs that offer the greatest overall value to you. A committee of independent, actively practicing doctors, pharmacists, and other providers regularly review and modify the formulary to maintain its effectiveness and value.

Using drugs on the formulary can help you reduce your out-of-pocket costs. This formulary may help guide you and your doctor in selecting an appropriate drug for you. We encourage you to talk to your doctor about prescribing formulary drugs. Remember, only you and your doctor can determine which drug is right for you.

To search for a drug name within this PDF document, use the Control and F keys on your keyboard, or go to Edit in the drop-down menu and select Find/Search.

All benefits are subject to plan provisions. Please refer to details about your pharmacy benefit plan and applicable deductibles, copays, and/or co-insurance in your summary of benefits and coverage (SBC). Your up-to-date SBC may be mailed to you by your health plan at the beginning of your plan benefit year. Alternatively, you may contact our Consumer Services team by calling the number on the back of your Member ID Card.

## DRUG TIERS

The following drug tier definitions correspond to the tiers listed in the second column of the drug list:

Tier	Definition
<b>Tier 0</b>	Preventative Drugs
<b>Tier 1</b>	Formulary Generic
<b>Tier 2</b>	Formulary Preferred Brand
<b>Tier 3</b>	Formulary Non-Preferred Brand

## RESTRICTIONS

For reasons of safety and effectiveness, some drugs on the drug formulary have restrictions on their use. If a drug has a restriction, it is noted with a two-letter code in the third column of the drug list. The abbreviations have the following meanings:

Abbreviation	Definition	Description
<b>AL</b>	Age Limit	Drugs with an age limit are only covered for certain ages.
<b>PA</b>	Prior Authorization	Drugs with a prior authorization require your doctor to receive approval from the plan to be covered.
<b>ST</b>	Step Therapy	Drugs with step therapy require you to try certain drugs first before the alternative drug is approved for coverage.
<b>QL</b>	Quantity Limit	Drugs with quantity limits are restricted to the quantity covered by your plan during a specified time period.
<b>SF</b>	Split-Fill	Drugs in the split-fill program are restricted to a 15-day supply for the first fill.

## FREQUENTLY ASKED QUESTIONS:

### *How are formulary drugs selected?*

Drugs on this list are selected based on the recommendations of a committee made up of doctors, pharmacists, and other providers. The committee regularly reviews drugs regulated by the U.S. Food and Drug Administration (FDA). Both drugs that are newly approved by the FDA, as well as those that have been on the market for some time, are considered. Drugs are selected based on safety, effectiveness, cost, and how they compare to other drugs currently available.

### *What is prior authorization and how does it work?*

Your pharmacy benefit plan may require review of medical necessity before covering certain drugs. Prior authorization, also known as preauthorization, is a process that monitors the use of certain drugs to ensure they are prescribed for appropriate clinical situations. Drugs subject to prior authorization typically have safety considerations, high costs, or high potential for inappropriate use. Drugs requiring prior authorization must meet specific medical criteria before your plan will cover them.

The prior authorization process usually involves these steps:

1. To initiate a prior authorization, your doctor, pharmacist, or other provider can submit a request electronically through CoverMyMeds, fax a completed [prior authorization form](#) to us, or call the number on the back of your Member ID Card.
2. Your doctor submits certain medical information to help us make the coverage decision.
3. You and your doctor's office are notified about whether the drug has been approved or not.

If a prior authorization is denied or has not been submitted, the drug will not be covered, and you will be responsible for the entire cost of the drug.

### *What is step therapy and how does it work?*

Your pharmacy benefit plan may include a step therapy program. Step therapy requires that you must first try certain proven, effective, and lower cost drugs before your plan covers alternative drugs that are more expensive or pose other potential downsides such as negative side effects. For example, many brand drugs have less expensive generic or brand alternatives that might be an option for you.

The following is an example of step therapy:

You take a generic drug to lower your blood pressure, but it is not working. Your doctor prescribes another drug, but it is still not working. Your doctor then prescribes a different drug that is more expensive and requires step therapy. Before the more expensive drug is covered, we will check to see if you have first tried the lower cost drug options included on the drug formulary.

In some cases, your doctor may decide that it is medically necessary to take the "higher step" drug without first trying the "lower step" drugs. If this occurs, the doctor may submit a prior authorization requesting a step therapy exception.

### *What are quantity limits and how do they work?*

Your pharmacy benefit plan may include a quantity limit program. Quantity limits are designed to help encourage safe and appropriate drug use as intended by the FDA. Overuse of certain drugs may lead to poor outcomes or side effects. Quantity limits may restrict the quantity of a drug per prescription or in a given time period. If your doctor prescribes a quantity that is greater than what is allowed, they will need to submit a prior authorization requesting a quantity limit exception in order for the drug to be considered for coverage. Without a prior authorization, your prescription may be rejected, or you may be responsible for the cost of the prescription beyond what your coverage allows.

### *What if my drug isn't on the formulary?*

The drug formulary does not contain a complete list of all available drugs. Some drugs are non-formulary or excluded from coverage. We have a formulary exception process for individuals to request coverage of a drug that is not on our drug formulary. If you would like to initiate a formulary exception, your doctor can submit a prior authorization or contact RxAdvance by calling the number on the back of your Member ID Card.

### *How are my out-of-pocket costs determined?*

This drug formulary shows prescription drugs in tiers. Generally, each drug is placed into one tier, which determines your out-of-pocket costs. Your out-of-pocket costs may include a deductible and copay or co-insurance. To verify the amount you will pay for a drug, review the SBC mailed to you at the beginning of your plan benefit year or visit the Member Portal. Alternatively, you may contact our Consumer Services team by calling the number on the back of your Member ID Card.

### *Why should I consider a generic drug?*

Using generic drugs, when right for you, can help you save on your out-of-pocket costs. Like brand drugs, generic drugs are approved by the FDA and meet the same standards. According to the FDA, an FDA-approved generic drug must:

- have the same active ingredients as the brand drug;
- be as safe and effective as the brand drug; and
- meet the same standards set by the FDA.

The difference between a brand drug and a generic drug is that the generic often costs much less. Once a generic drug becomes available, the brand drug may become non-formulary or excluded from coverage. If you or your doctor requests a brand rather than a generic drug, you may be responsible for the difference in cost between the brand and generic drug plus the higher tier copay or co-insurance. Only your doctor can determine whether a generic alternative is right for you.
